NEW PRODUCTS FROM KWC

KWC MONTA **PAGE 56**

KWC MONTA is a timeless yet modern line of faucets with confident, bold design that fits perfectly in any bathroom. At the same time, KWC MONTA also features an array of ingenious features and attention to detail that turns the ordinary into something extraordinary.

KWC +

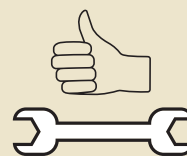

KWC SwissSmartness

Intelligent design culminating in excellent performance: KWC SwissSmartness embodies superior product design that makes perfection and elegance not only visible, but also tangible.

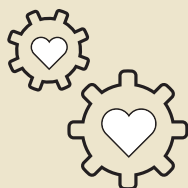

KWC QualityControl

Exceptional quality from A to Z: with KWC QualityControl, we guarantee the utmost product reliability. KWC performs and continuously monitors all stages of the process: development, production, installation, and even the manufacture of the required tools.

KWC ServiceControl

A commitment to quality that extends long after delivery: KWC ServiceControl is backed by a well-trained team of tried-and-true KWC experts in Switzerland. In the event of a claim, they are on site in no time at all – equipped with the right tools and the necessary expertise.

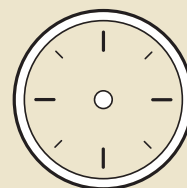

KWC DetailPassion

Crafted with love, down to the last detail: KWC DetailPassion describes our legendary eye for subtle nuances and that special something. This valuable skill has made us a leading international supplier of superior quality faucets that continue to raise the industry standard.

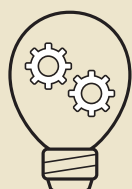

KWC CertificationGuarantee

Trust is good, certifications are better: our KWC CertificationGuarantee ensures that we have all of our products professionally inspected and certified across all markets.

KWC TimelessDesign

Designed for longevity: KWC TimelessDesign represents exacting aesthetic standards of elegance and perfection that are at once modern and timeless.

KWC InnovationDrive

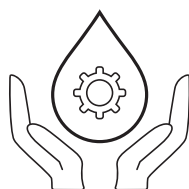

A tradition of innovation: Our innate passion for challenging the status quo, optimizing products and processes, and setting trends – that is KWC InnovationDrive. A unique spirit that has defined us since 1874.

KWC + SUSTAINABILITY

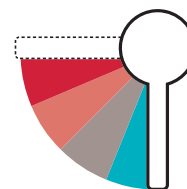

EcoProtect

For the highest energy classes and responsible use of resources: EcoProtect represents our commitment to promoting a sustainable lifestyle. For example, the turning handle that limits the water flow level. To switch off the water-saving mode, simply turn the handle back past the soft catch point.

HealthProtect

Better hygiene and unchanged water quality: HealthProtect highlights the strict standards we set ourselves to ensure that our faucets do not affect the taste and smell of your water – that is why we use high-quality materials (metals, plastics) that are ideally suited for contact with water.

CoolFix

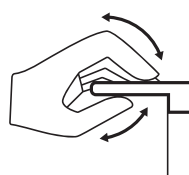

Intelligent and efficient resource usage: With CoolFix, when the lever is in the center – the most common position – the water runs cold. Only when the lever is turned to the left, the water runs warm.

KWC + DESIGN

DesignSpray

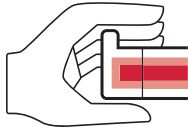

Elegant design and functionality: With DesignSpray, the pull-out spray is seamlessly integrated and recessed. It can be easily extended with just one finger.

UniqueLever

Innovative lever designs that allow for natural and intuitive use: UniqueLever features innovative KWC design – elegance and precision that you can not only see, but also feel every day.

KWC + INNOVATION

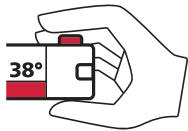

TouchProtect

Safe to use: An insulated hot water guidance system with a “double skin” principle means the body of the faucet or the pull-out spray can become warm but never hot. In this way, TouchProtect intelligently prevents scalding.

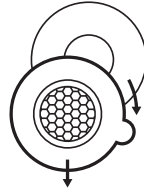

SprayLock

Adjust the flow: With SprayLock, you can keep the jet of water from your faucet flowing exactly how you want, even when the water is shut off. When you turn the water back on, the water flows in the same way again.

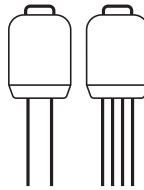

SkinProtect

Effective protection against scalding: With SkinProtect, your faucet will only supply you with water hotter than 38 °C when you press the safety button on the temperature controller. If the cold water is shut off, the faucet automatically shuts off the hot water immediately.

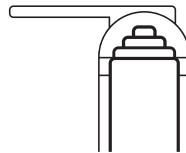

SprayClean

Actively helps with the removal of limescale: With a special faceplate and fastening mechanism, SprayClean prevents limescale buildup. Any deposits are sprayed away automatically when the water is running. The special fastening mechanism helps with more stubborn lime deposits: simply turn, clean, and the job is done.

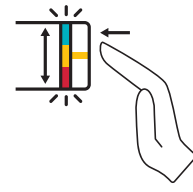

PowerClean

The spray you want at the touch of a button: PowerClean makes it exceedingly easy to switch the flow of water on the spray head – from a standard spray to a fine needle spray.

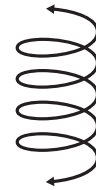

ShieldProtect

Extended service life and secure protection: ShieldProtect uses a special membrane to seal the faucet, protecting it against cleaning products and dirt.

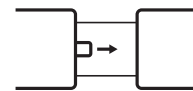

IntelligentControl

Intuitive control meets modern convenience: IntelligentControl reacts to a tap of your finger, can be programmed based on your personal habits and requirements, and has a light ring that indicates the current water temperature.

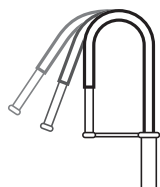

TwistProtect

Effortless work around the sink: TwistProtect prevents the hose from twisting or knotting.

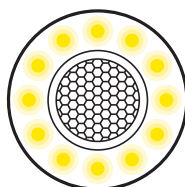

EasyLock

A spray that is easy to use and automatically snaps into place: EasyLock is equipped with special positioning pins that ensure that the pull-out spray is always in the right position.

HighFlex

Increased freedom of movement and ease of use: HighFlex makes it possible to move the spring hose in every direction while ensuring it remains reliably stable when not in use.

LEDShine

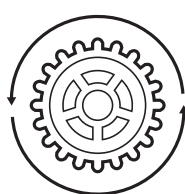

Visible precision and a bright, friendly workspace: LEDShine does more than just contribute to a special working atmosphere – this innovative feature makes it easier to see the tiniest specks of dirt and makes it possible to use the faucet without turning on a light.

KWC + QUALITY

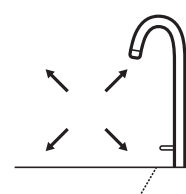

GlacierFinish

Robust surfaces and high-quality craftsmanship: GlacierFinish is equipped with durable surfaces that are exceptionally robust and feature an attractive polished shine that you can enjoy for years to come.

PrecisionMove

Exceptional elegance and precision: PrecisionMove allows for seamless movements and exceptional convenience thanks to our consistent use of top-quality materials and superior craftsmanship.

OptimalSpace

Practical yet elegant ergonomic design: OptimalSpace features long, tall spouts that provide ample space for washing and or working.

**THE PURSUIT
OF PERFECTION**

Achieving excellence in anything is a journey, a constant pursuit of perfection. For KWC, and the great craftsmen we employ, this journey has led to our company being recognized as one of the finest makers of faucets anywhere in the world.

IT IS A RECOGNITION THAT WE NEVER TAKE LIGHTLY.

Because we see our life's work for what it truly is: the opportunity to make a product of perfection. One that connects all who use it, with the one true source of life on this planet... a source we in Switzerland have been blessed with in great abundance. Water.

Through design, through a tremendous sense of aesthetic, through precision and handcrafting, and yes, through a good deal of blood, sweat and tears, we recognized a long time ago one undeniable truth:

AT KWC, OUR DESTINY WAS NEVER TO INVENT THE FAUCET, OUR DESTINY WAS TO PERFECT IT.

Fortunately for us, we just happened to be genetically and geographically predisposed to creating perfection, after all, we're Swiss. It's in our DNA.

And so it was, back in 1874, when KWC was founded by Adolf Karrer, that this journey of perfection would begin. Not with faucets to start, but with exquisite music boxes.

Even back then, a strong sense of aesthetic had KWC creating works of art. But it was an art form that combined artistry with mechanical mastery. KWC's music boxes became famous, not only for their beauty, but for their precision and for their tremendous attention to detail.

As all journeys can take interesting turns, so too would ours. Because in the late 1800's, the demand for convenient access of water in households was growing, so much so, that soon KWC would test the waters, so to speak, and begin the production of faucets. It didn't take long before KWC's unique ability to combine artistry with mechanical mastery would set us apart. →

By 1906, some of the great brands of the era were knocking on our door to produce custom-made faucets that would meet, or better still, exceed their expectations. These included the Hotel Ritz in Paris, the Hotel Negresco in Nice and many more.

WITH THIS KIND OF ATTENTION, WORD SOON SPREAD ABOUT KWC, ABOUT ITS ARTISTRY, ABOUT ITS CRAFTSMANSHIP, ABOUT ITS ATTENTION TO DETAIL AND ITS QUALITY.

The world had discovered the Swiss Watch of Faucets. And it wanted more. KWC perfected the faucet design and created a legacy of industry firsts, like the retractable hand faucet in 1957 ... And they continued to do it again and again with a spirit of innovation never seen before.

TO THIS DAY, IN EVERY SKETCH OUR DESIGNERS MAKE, EVERY DIE WE CAST, EVERY FAUCET WE POLISH BY HAND, ECHOES OF A GREAT HISTORY ARE ALL AROUND US. SO TOO IS A VISION FOR OUR FUTURE.

It is a vision that recognizes the gift of nature that we Swiss feel to our core and the need for sustainability rather than disposability.

It is a vision that allows every customer to experience the power, the beauty and the essence of nature that flows through our products. To have a true «Swiss Water Experience». Precise. Pure. Elegant. And it is a vision that keeps us on this journey that began over one hundred and forty years ago ... in the pursuit of perfection and the achievement of excellence in connecting humans with water.

That is purpose.
That is Swiss.
That is KWC.

1 — Blanks for fittings. **2** — View of the foundry in Unterkulm in 1880. Our experience and knowledge have both origins and history. **3** — In 1978, KWC developed and began to use the first low-pressure die-casting machines in the world. The company still employs this technique today. **4** — Each individual part is accurately machined in a step-by-step process. In order to meet the high quality standards, the procedure is continually monitored before moving on to postprocessing. **5** — To make the fittings, pure brass which arrives in the form of ingots is used. **6** — The basic shape of the fitting in brass. **7** — With low-pressure die casting, the brass is first melted and then poured into sand molds – creating the basic shape of the fitting in brass.

Information

Color differences on stainless steel surfaces on different parts of a Franke Water Systems AG, KWC faucet made out of stainless steel, cannot totally be excluded. Different factors may lead to a slight color differentiation.

1. Already a slight difference in material composition may cause stainless steel to reflect light differently (more blue or yellow reflections). These differences in steel compositions still fulfill DIN valid material standards. They may occur within one lot of a steel production unit.
2. Different cooling or production treatment parameters may also cause color surface differentiation.
3. Different surface consistency caused by the production process may as well lead to a different light reflection, so that other colors appear.

Our aim is not to have another surface process to guarantee a 100% stainless steel color consistency. Beside the unique KWC faucet design we would like to keep a puristic surface finish of natural stainless steel in match with our design philosophy.

By keeping production tolerances at a narrow level, we try to keep slight stainless steel surface color differentiation as little as possible. But we cannot exclude them totally. As with upper class wooden furniture, where a slight color differentiation is accepted as well on the surface, it has to be accepted that high quality faucets made by our standards may have slight color differences on their surfaces.

Operating Data

Minimal operating pressure	1 bar (15 PSI)
Ideal operating pressure	3 bar (45 PSI)
Maximal operating pressure	5 bar (70 PSI)
Equal pressures are recommended	
Maximal hotwater temperature	70°C (180°F)

Attention:

Before installation, flush pipes thoroughly!

For further information refer to our detailed sales literature.

Damages on the faucet resulting from incorrect handling are excluded from the manufacturers warranty!

General conditions

All our quotations, sales and deliveries shall be subject to the following conditions exclusively, even if the customer expressly specifies otherwise. With the acceptance of our confirmation of order or the delivery of our goods, the customer declares his acceptance of our terms and conditions. Silence on our part as regards the customer's terms and conditions shall not constitute any acknowledgement of, or consent to, the customer's terms and conditions under any circumstances. All quotations are without obligation.

Supplementary agreements and any other informal commitments need to be confirmed in writing by our Head Office in every case. None of the information contained in our catalogues is binding. This also applies to illustrations, weights, measurements and performance data. We reserve the right to alter specifications without notice.

1. Prices and sales tax

The prices and conditions which will apply are those in effect at the date of delivery. The quoted prices for our product range are EX WORKS, incl. packaging, not insured unless otherwise expressly and separately agreed. At the time valid Incoterms shall apply. All prices shall be exclusive of Value Added Tax, which is shown separately in our invoices.

In the case of inter-company deliveries, the purchaser shall give us an undertaking that the goods are being procured for his own company and are subject to the tax regulations applicable in his country. Prices are subject to change without notice.

2. Delivery and acceptance

Quoted delivery periods are approximations. If circumstances arise for which we are not responsible, e.g. a delay occasioned by delivery problems on the part of our subcontractors, the delivery period shall be extended accordingly. The delivery period shall also be appropriately extended in the event of industrial action, particularly strikes and lockouts. In the event of a resultant delay in delivery on our part, the customer shall not be entitled to any claims or cancellation of the transaction.

3. Right of the supplier to withdraw

In the event of a serious deterioration in the customer's business, particularly financial circumstances, stoppage of payments, winding-up or transfer of the business or his death or similar, or if the customer pledges stock, receivables or the purchased goods, or orders them as a security for other creditors, the supplier shall be entitled to demand security and to rescind his obligation to supply if the security is inadequate, and to demand compensation on grounds of nonfulfilment. In the event that we are prevented from manufacturing the ordered goods due to circumstances for which we are not to blame, we reserve the right to withdraw from the contract, wholly or partially, without the client being thereby entitled to make any claim whatsoever for compensation, subsequent delivery or withdrawal from the contract.

4. Packing, transport, carriage charges, small order supplement and transfer of risk

We reserve the right to choose the type of packaging used. Cardboard, paper and plastic packaging will not be taken back but must be disposed of by the receiver of the goods. Pallets, wire-mesh box pallets and other usable containers may be returned to us, carriage paid, within three months. Deliveries by post and express services will be charged at cost. If a carriage paid delivery is agreed, the supplier shall be entitled to choose the method of transport employed. For consignments to third parties, an adequate supplement of a percentage of the value of the goods will be charged.

All risks shall be transferred to the customer when the goods leave our factory/depot or are made available to the customer at our factory/depot.

5. Terms of payment

Our invoices are payable within 30 days net in Swiss Francs or Euro after receipt of invoice unless otherwise expressly and separately agreed. In the event of delays in payment, the customer shall without further reminder be liable to pay to Franke Water Systems AG, KWC default interest at a rate of 2% above the relevant discount rate of the National Bank of Switzerland. As long as older invoices remain unpaid, no entitlement to discount shall exist on the payment of new invoices. Bills of exchange shall not be accepted. If payment is made by cheque or other form of documentary remittance, the charges therefore shall be borne by the customer. If the customer is late in making a payment or his financial situation deteriorates markedly after the conclusion of the contract, all debts shall immediately become due for settlement. The customer may only offset these with uncontested or legally established counter-claims. The punctuality of payments, or otherwise, is determined by the date on which the funds are received by us.

6. Retention of title

We shall retain title to the goods supplied until all the debts due to us and incurred as a result of the business relationship have been settled in full, irrespective of the legal justification therefore. As far as such retention of title has to be recorded in public registers, the customer undertakes to issue all statements legally due for this purpose upon the supplier's first request. The customer shall be entitled to process our products or to use them with other products within the scope of his regular business operations. As a surety against our aforesaid entitlements, we shall acquire co-ownership of the objects resulting from the processing or combined use of our products, the said co-ownership being assigned to us by the customer coincidentally with the acceptance of these Conditions of Sale. The customer shall be required to keep the objects subject to our co-ownership at no charge to us. The amount of our share of co-ownership shall be determined in accordance with the value of our product relative to the value of the object resulting from its processing or combined use by the customer.

We grant our customers the right of resale in the normal course of business, subject to revocation. The said right shall be withdrawn in the event of a suspension of payments. With the acceptance of these Conditions of Sale, the customer shall assign to us all the debts and additional rights accruing to him from the resale. The assigned debts shall serve as a security for all our claims. The customer shall be entitled to collect the assigned debts, provided we have not revoked this authorisation. The authorisation to collect debts shall be withdrawn, even without any express revocation, if the customer suspends his own payments. If we so request, the customer shall inform us in writing and without delay as to whom he has resold the goods and the debts due to him as a result of the resale, and furnish us with certified documents of transfer of the debts at his expense. The customer shall not be entitled to any other provisions in respect of the objects to which we retain title or of which we hold co-ownership, or in respect of any debts assigned to us. The customer shall notify us without delay of any attachments or other legal impairments relating to objects belonging to us, either wholly or partially.

We shall be entitled at any time to call for the return of goods belonging to us if the customer falls into arrears on a payment or if his financial situation deteriorates to a marked extent. If we enforce this right, withdrawal from the contract shall only arise if we expressly declare the same, irrespective of any other mandatory official regulations. If the value of the securities assigned to us exceeds our receivables and entitlements to redemption by more than 20%, we shall, at the customer's request, release securities to an amount to be decided by us. Samples and drawings shall remain our property, even if the customer bears the costs, or a proportion of the costs, thereof.

7. Returns

Goods may not be returned without our prior consent. Failing this, returned goods shall not be accepted. In the case of returns, we shall be entitled to levy a processing charge according to our goodwill procedure. The costs of any reconditioning required shall be invoiced separately. If goods which have been delivered carriage paid are subsequently returned by the customer, the costs of the initial delivery shall be deducted from the credit note.

8. Warranty and Liability

We guarantee the perfect, functioning of our products provided they are installed correctly and in accordance with their intended purpose. In the event of proven defects in material or workmanship we shall provide full replacement of materials. We shall not be liable for any further damage, particularly as a result of improper handling, overloading or natural wear and tear. This shall apply in particular to surface damage caused by the use of incorrectly used, abrasive or aggressive cleaning agents. Our warranty and liability in respect of materials not manufactured by us shall be restricted to the warranty and liability provided for in the conditions of sale or our subcontracted suppliers. The warranty period shall be 2 years from the date of invoice of the defective fitting. If we manufacture goods to a customer's specification, he shall be wholly responsible for ensuring that no patents or other third party rights are infringed. Any complaints concerning the weight, quantity or quality of the goods shall be notified in writing immediately after their discovery and, in any case, one week at the latest after receipt of the consignment. If the complaint proves to be justified, a replacement consignment shall be delivered free of charge and carriage paid to the original destination; in the event of quality defects, however, this shall only apply if the faulty parts are returned. Any further claims for replacements or abatement or compensation for indirect and/or direct damages shall be excluded, unless we are unable to effect a re-delivery or are guilty of gross negligence. The goods must still be in the condition in which they were delivered. For goods which have been used, the warranty terms agreed by us with suissetec (Schweizerisch-, Lichtensteinischer Gebäudetechnikverband) shall apply.

9. Place of fulfilment, court of jurisdiction, obligations imposed by contracts

The place of fulfilment for all the obligations arising from the contract is the place in which the supplier's premises are located. The court of jurisdiction for both parties is the supplier's domicile.

The contractual relationship is subject to the material laws of Switzerland. Should any provision of the contract be or become partly or entirely invalid, the validity of the remaining provisions of the contract shall not be affected. The invalid provisions are replaced by a valid rule, which attains the parties economic intent and purpose with regard to the invalid provision. The same shall apply in the event of any gaps of the contract. The Swiss original of the "Conditions of Sale and Delivery" is authoritative.

The products and prices listed in this catalogue are correct as of 1.1.2019. Adaptations to technology and design may occur at any time. The suitability of the faucets must be checked for each individual project. The specifications and installation and service instructions provided by Franke Water Systems AG, KWC, are definitive for planning and technical implementation. The relevant information can be ordered directly from KWC or obtained at www.kwc.com.
