GERMANY

Fresh ideas for your kitchen.
Sinks, mixer taps and more.

www.vosoughishop.com

Modern kitchens
for convenience.
Perfect solutions offered by BLANCO.

Sink: BLANCO ANDANO XL 6 S-IF Compact, stainless steel satin polish
Mixer tap: BLANCOCULINA-S Mini, chrome

You should never compromise when buying a sink centre. What counts above all else is **quality** – in every respect. As well as the **perfect processing of top-quality materials**, this also includes contemporary **design down to the tiniest detail** and **perfectly matching accessories**.

BLANCO is one of the leading suppliers of sink centres and, with **more than 90 years of experience**, avails of extensive expertise in order to keep developing **innovative solutions** for its customers.

BLANCO's particular strengths are system concepts that make optimum use of available space, make work easier and continue to look good even after many years.

Discover how your requirements can be easily satisfied on the following pages.

You will also find further information about BLANCO at www.blanco-germany.com

BLANCO turns sinks into sink centres.

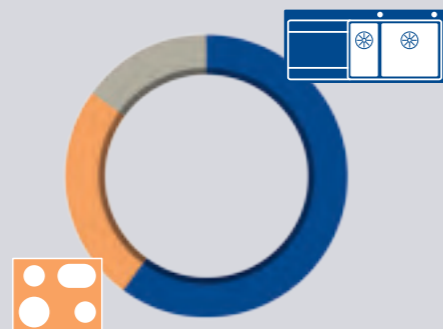

Quality and convenience for the central area of the kitchen.

Sink: BLANCO AXIA III 6 S, SILGRANIT™ PuraDur™, rock grey
Mixer tap: BLANCO ALTA-S Compact, SILGRANIT™ look, rock grey/chrome
Waste system: BLANCO SELECT 60/3 Orga

The sink is the most important workplace in the kitchen.

60 % of time spent in the kitchen is spent at the sink. After all, preparing, washing and chopping are important tasks which should be as efficient as possible and which no machine can handle for you.

Time spent in the kitchen:

-  60 % Sink
-  25 % Hob
-  15 % Rest

The sink centres offered by BLANCO create additional value for your kitchen.

Be it from a practical aspect, entirely co-ordinated to the workflows in your household, or visually in the choice of material, shape and colour.

Good to know!

Tips for the ideal sink centre.

Preparing food, pouring, rinsing, running water – your sink centre is obliged to satisfy **many demands**. It makes sense therefore to **consider beforehand** what **requirements** need to be fulfilled. Whether meeting the challenges of a large family or as the centre of attention as a designer item. We have plenty of useful tips here to help you when making your **selection**.

Making the most of space

The ideal width for base cabinets is 60 cm. But other spatial situations also offer plenty of possibilities. For example, sink centres which are suitable for more compact base cabinets, as corner solutions or in front of windows.

Convenient and ergonomic products

A first-class sink centre is distinguished by a perfect interplay by the sink, mixer tap, waste system and accessories. That's why the bowls and matching accessories are co-ordinated in such a way that they permit smooth workflows.

Tried-and-tested materials

At BLANCO, we produce sinks in three tried-and-tested materials: stainless steel, SILGRANIT™ PuraDur™ and ceramic. Coloured sinks enable you to co-ordinate the sink centre perfectly to your kitchen fittings and furnishings. Either tone in tone or contrasting.

Attractive colours

Sinks and bowls made of SILGRANIT™ PuraDur™ or ceramic are available in various colours and with matching mixer taps. Enabling you to achieve conscious contrasts or a harmonious overall appearance. You will find the full colour range on page 11.

Mixer taps to suit any requirement

The sink centre is complemented by the right mixer tap which also offers additional functions, e.g. as a variant with a hose spray or an integrated drain remote control. BLANCO voluntarily has its mixer taps certified in accordance with stringent quality criteria.

Various installation options

Many bowls and sinks can be installed in different ways. Such possibilities range from classic installation from above through undermount solutions to modern IF flat rims which also permit flush installation.

Practical waste solutions

An intelligent waste system helps you to separate waste cleanly and keep everything tidy. Perfectly co-ordinated, it is installed right inside the sink centre, helping you to make optimum use of it, e.g. in the form of extra storage space for cleaning utensils.

Easy maintenance

Thanks to their particular properties, modern materials such as SILGRANIT™ PuraDur™ prevent dirt and water from building up.

Special tip

The BLANCO model assistant supports you in finding the perfect combination of sink and mixer tap.

www.blanco-germany.com/modell-assistent

Quality in its most attractive form.
BLANCO sets new standards.

At BLANCO, form meets function – and always in line with modern kitchen concepts. **Renowned awards** confirm the design competence offered by BLANCO.

These brand products are also convincing thanks to **high-quality materials**, a **professional finish** and **reliable service**.

BLANCO
STEELART

Those looking for something special
will find it at BLANCO STEELART.
Exclusive stainless steel solutions.

Worktop: Stainless steel Durinox™ with chamfer
Bowl: BLANCO CLARON, stainless steel satin polish
Mixer tap: BLANCO CULINA-S, stainless steel finish

In the form of BLANCO Durinox™, BLANCO STEELART presents a unique material innovation. With its refined stainless steel surface featuring state-of-the-art technology, BLANCO Durinox™ is convincing both visually and functionally. Unlike conventional stainless steel, this surface is extremely resistant to scratches and less sensitive to fingerprints.

BLANCO ZEROX 700-U, stainless steel Durinox™

The high-tech production of BLANCO STEELART offers elegant design for sophisticated demands. Bowls featuring a clear design vocabulary and customised worktops are eternally fascinating thanks to their materials and surface finish. And there is a large selection of sinks and bowls for undermounting, top-mounting or flush installation.

More information is available online or on pages 34 – 38 of this brochure.

BLANCO JARON XL 6 S-IF, stainless steel satin polish

BLANCO ATTIKA, stainless steel satin polish

BLANCO CLARON, stainless steel satin polish

Brilliant: the three-tier sink system.

The series BLANCO ETAGON in stainless steel and SILGRANIT™.

Bowl: BLANCO ETAGON 500-IF/A, stainless steel satin polish
Mixer tap: BLANCO PANERA-S, brushed stainless steel

The ETAGON rails included in the scope of delivery rest perfectly on the functional ledge. They are non-slip and non-tilting.

Neat and tidy: plenty of space for a sponge and dishcloth.

Baking trays can be easily soaked and cleaned in the spacious individual bowl.

The three-tier sink system for added convenience through a unique function. BLANCO ETAGON 500 extends the individual bowl to include an additional functional level. The brand new system concept has all the versatility of the sink centre, yet requires little space.

The integrated ledge combined with the specially developed ETAGON rails permits working at three levels of the modern, linear bowl. Placed in the centre, the rails will accommodate items such as pans and steam cooking containers. When the chopping board is placed on top, vegetables can be handled while other ingredients are rinsed in the actual bowl. Baking trays can be easily washed in the large individual bowls.

One bowl, three levels: BLANCO ETAGON offers the functions of a sink centre but requires less space.

BLANCO ETAGON 500-U in SILGRANIT™ PuraDur™

When undermounted, these new bowls cut an equally good figure as the additional built-in variants with IF flat rim and IF/A with an integrated tap ledge, both suitable for flush or top-mounted installation.

The SILGRANIT™ PuraDur™ variant is available in ten colours.

Uniquely ergonomic.
The proven BLANCO AXial concept.

Sink: BLANCO AXIA III 6 S, SILGRANIT™ PuraDur™, white
Mixer tap: BLANCO LINEE-S, SILGRANIT™ look, Silgranit white/chrome

BLANCO product concepts satisfy high demands on use in the kitchen. They offer plenty of convenience and function as well as facilitating workflows.

Enabling you to dispense with superfluous movements and extra dishes when using the sink centre in the ergonomic AXial concept. After all, the chopping board can be slid along the sink making it a perfect prepping station when combined with the multifunctional basket which can be suspended underneath.

Sinks in the AXial concept are available in stainless steel, SILGRANIT™ PuraDur™ and ceramic as well as in many different sizes and models.

More information is available online.

BLANCO AXIA III 6 S, SILGRANIT™ PuraDur™ white with glass chopping board

BLANCO AXIS III 6 S-IF, stainless steel, with chopping board made of safety glass

BLANCO AXIS III 6 S-IF Edition, stainless steel, with special accessories

BLANCO AXON II – the ergonomic sink made of ceramic

Life in the sun.
Attractive solutions for installation
in front of the window.

Mixer tap: BLANCO LARESSA-F, chrome

The area **in front of the window** is ideal for installing a sink if you wish to make optimum use of space as a worktop with a view. BLANCO offers a wide range of window mixer taps that make sure **nothing** gets in the way when opening or closing the window. An extensive range of designs and three different types of construction leave little to be desired.

Fold-down

Fold-down mixer taps in front of the window can be lowered into the bowl within seconds. The dampened folding process and an audible click make this mixer tap stand out from the crowd.

BLANCO LARESSA-F is also available as a built-in variant with the lever on the left.

Removable

To enable the window to be swiftly and easily opened, removable models which can be set to the side are also available in the extensive range of mixer taps offered by BLANCO – and in various designs and models.

The successful BLANCO LINUS-S-F model

Retractable

The category of retractable window mixer taps represents an elegant solution. By exerting slight pressure, the slim body can be smoothly retracted and the mixer tap remains functional in any position.

Convincing in function and design:
BLANCO PERISCOPE-S-F II

The most attractive connection between nature and design. BLANCO ceramic sinks.

Sink: BLANCO IDENTO 6 S, ceramic PuraPlus™, crystal white
Mixer tap: BLANCO LINUS-S, ceramic look, crystal white

The appeal of ceramic sinks and bowls lies in their natural look. This enables them to create a pleasant atmosphere while modern production techniques permit trendy shapes with slim rims or small radius designs.

Choose from the BLANCO ceramic range and seven attractive colours to match your individual interior style. More information available from page 46 onwards.

The BLANCO IDENTO range in particular is indicative of how contemporary ceramic sinks are. Subtle aesthetics and spacious functional areas leave nothing to be desired.

Particularly large bowl with spacious drainer BLANCO ZENAR XL 6 S.

BLANCO IDESSA 9 – as a double-bowl sink with character.

The puristic design of BLANCO PALONA 6 for contemporary kitchen styles.

BLANCO PANOR 60, based on the classic sink module.

The fascination of perfect design.
 BLANCO InFino™ offers new perspectives.

Bowl: BLANCO CLARON 700, stainless steel satin polish, shrink-wrapped in R1 worktop
Mixer tap: BLANCO CULINA-S Duo, chrome

BLANCO InFino™ – the perfection of the sink centre:

- Elegant puristic design
- Smart manual handling concept, optionally with remote control
- Integration almost without rims
- Available with all BLANCO sink materials
- Pre-defined, always precisely centred position of the strainer
- Gap-free for easy cleaning and hygiene
- Service-friendly construction with fast valve installation

Elegant in steel. BLANCO InFino® – the expression of perfect harmony.

Eye-catching in SILGRANIT®. Harmonious design.

Valuable in ceramic. Function carefully planned from scratch.

BLANCO InFino™ is the elegant way to create excitement at the sink. Thanks to the clear, contemporary design, the new drain concept adapts perfectly to the bowl topography. The result is a generous, calm overall effect that is pleasing to the eye and enhances the sink centre.

The elements merge at the base of the bowl: BLANCO InFino™ and SILGRANIT™ PuraDur™, ceramic or stainless steel meet each other smoothly, almost seamlessly – in perfect harmony. The dramatic reduction of joints, rims and edges is a key feature of the concept. It creates a visual balance and an extremely elegant overall appearance.

The basket strainer is always positioned exactly in the centre of the drain thanks to the prescribed setting.

Extremely easy care thanks to the design almost without joints and edges.

The plug and the strainer: only two components for reliable hygiene.

The smart handling concept

Perfection can be this simple: operation of InFino™ is intuitive and logical. A gentle turn on the strainer opens or closes the drain – with virtually no friction, inaudibly, precisely.

Before buying, decide which factors are of importance for you when it comes to a mixer tap. What should it offer in terms of function and design?

The large BLANCO range features a wide variety of models, sizes, shapes and variants with special functions. Mixer taps with extendable hose sprays are recommended as they significantly extend the working range and facilitate filling high pots and vases, for example.

Aesthetics and function in all aspects.

BLANCO FELISA-S

Every kitchen needs a bin. Near the sink, where most of the waste is produced. BLANCO offers customised solutions for any cabinet unit in a harmonious design and with the optimum hygiene and cleanliness. And no less important: quality that proves itself every day anew. BLANCO waste systems are ideal for modern kitchens and the highest demands.

Inner and outer values – Award-winning design for a beautiful life.

Aesthetics and function are not mutually exclusive, but rather one leads to the other. Which is why a design made by BLANCO is never an end in itself.

An example? High-quality material combinations not only leave our waste systems with good-looking surfaces, but are also especially stable, robust and easy to clean. Something of which internationally renowned panels of experts are also convinced – and whose awards naturally delight us. And yet we never stop constantly developing better and better solutions for you.

Keeping order
with style.
Waste and organisation
systems by BLANCO.

Waste system:
BLANCO SELECT 60/3 Orga

Installed in minutes, it also includes small bin sizes that are ideal for food waste.

BLANCO SELECT is a genuine organisational talent for waste and kitchen accessories with pull-out front in all cabinet sizes

With its modern design, exclusive features and many practical details, BLANCO SELECT ensures your base cabinets are tidy.

Perfect for a discerning kitchen ambience.

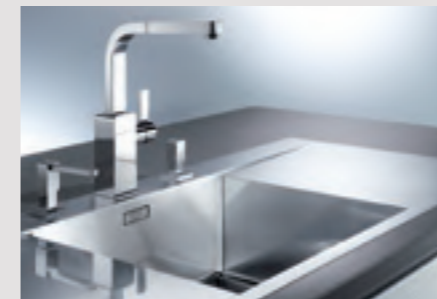

Stainless steel sinks and bowls.

The classic material for any taste.

Sink: BLANCO DIVON II 5 S-IF, stainless steel satin polish
Mixer tap: BLANCO LINUS-S, chrome

Elegant, robust and ready for any application.

Premium quality
BLANCO only uses the highest-quality stainless steel that is selected according to specific criteria and that is also subjected to strict quality checks. Special finishing processes complete the first class quality.

Hygienic
The surface of BLANCO stainless steel is smooth and pore-free. The extended use of stainless steel in the food industry stands for its exceptional hygienic properties.

Safe for food use
Stainless steel taints neither the appearance nor the flavour of food.

Robust
Stainless steel is robust. Any dishes that drop onto it will not break easily and impacts are absorbed.

Resistant
High-quality BLANCO stainless steel has a natural resistance to common household acids and stains such as coffee, tea, fruit and vegetables.

Easy-care
Stainless steel products by BLANCO retain their value and brilliance for decades with the minimum care.

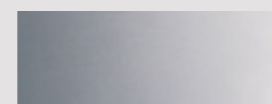

The beauty of stainless steel is that it not only convinces with timeless aesthetics but also with contemporary details such as the current IF flat rim.

Independent of the design style stainless steel fits perfectly to all kitchen environments and the wide choice of BLANCO models only goes to accentuate this. Or did you know that different BLANCO surface finishes enable numerous optic effects?

Overview of BLANCO stainless steel surfaces:

Satin polish

Natural finish

Brushed finish

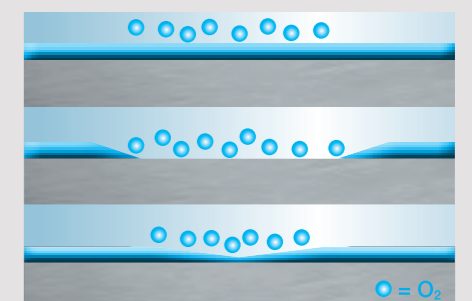

Linen effect

Heat-resistant and non-fading
Stainless steel is heat-resistant to 300 °C and will not change even in extended exposure to sunlight.

Rustproof
Stainless steel is always rustproof. Any flecks of rust that form on the surface are extraneous rust, and can easily be removed again.

Self-healing
Stainless steel is constantly renewing itself. The self-healing surface, known as the passive layer, regenerates constantly under the influence of oxygen.

Unique sinks made of SILGRANIT™ PuraDur™.

Sink: BLANCO ZENAR XL 6 S Compact,
SILGRANIT™ PuraDur™, nutmeg
Mixer tap: BLANCO FELISA-S, nutmeg

The **stony-silky** and very **finely-pored, closed surface** creates a soft stone-like character **which is wonderful to the touch.**

Ten attractive colours with a **consistent surface quality** are available and offer perfect co-ordination with BLANCO kitchen taps.

CombiColours

Material with magical properties.

Easy-care
Stains and signs of use can be removed easily with a scouring sponge and water.

Scratch-proof
Extremely strong and scratch-proof. SILGRANIT™ PuraDur™ is not damaged by normal cutting with standard household knives.

Heat-resistant
Sinks made of SILGRANIT™ PuraDur™ are heat-resistant up to 280 °C.

Impact-resistant
The tremendous impact resistance protects the sink against damage, e.g. by a falling saucepan.

Hygienic
Hygiene+Plus is a shield against dirt and bacteria, and makes cleaning easier.

Safe for food use
All kinds of foods can be prepared directly on the SILGRANIT™ PuraDur™ sink.

Acid-resistant
SILGRANIT™ PuraDur™ is resistant to acidic foods and aggressive cleaning agents.

Non-fading
Even in direct sunlight, colours are retained.

Pleasantly natural
The silky stone sealed surface with particularly fine pores creates a tangibly pleasant stone-like character.

A material in its most attractive form.
Let yourself be inspired by ceramic sinks from BLANCO.

Sink: BLANCO PALONA 6, ceramic, glossy crystal white
Mixer tap: BLANCO LIVIA-S, manganese

Sinks and bowls made of BLANCO ceramic create a **pleasant, homely atmosphere**.

They captivate with their flowing lines and glazed surfaces. BLANCO ceramic blends happily both with traditional kitchens as well as modern designs – either to provide a contrast or to match existing colours and shapes, whichever is preferred.

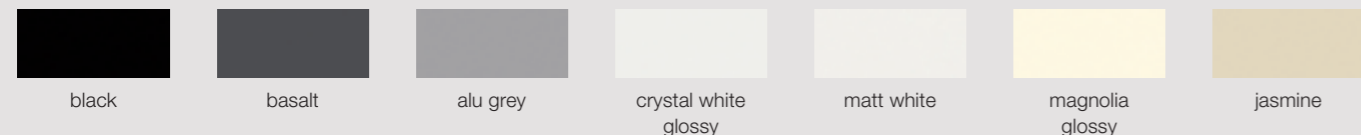

The particular features displayed by BLANCO ceramic:

- superior ease of care
- shock- and impact-resistant in normal use
- scratch- and stain resistant
- full-tone colours – matt or gloss
- manufactured using traditional methods
- heat-resistant
- hygienic and suitable for food preparation
- acid-resistant
- non-fading – even in direct sunlight

Ceramic PuraPlus™
With BLANCO PuraPlus™, ceramic sinks retain their “like new” look for longer. The special PuraPlus™ seal smoothes the surface. The hydrophobic effect reduces the build-up of residue (e.g. limescale) and **minimises stains**.

CombiColours

An outstanding combination of nature and design.

Unbeatably easy to clean
Stains and signs of use can be removed easily with a scouring sponge and water.

Scratch and cut-proof
Extremely strong and scratch-proof. SILGRANIT™ PuraDur™ is not damaged by the normal use of knives. (Exception: when using ceramic knives).

PuraPlus™ coating
The PuraPlus™ coating makes the surface even easier to clean. Dirt finds it almost impossible to adhere to the surface.

Non-fading
The colours of BLANCO ceramic products never change, even in direct sunlight, but retain their original beauty for many years to come.

Heat- and cold-resistant
BLANCO ceramic sinks are fired at over 1200 °C. Therefore hot pots and pans up to 280 °C can be easily placed on it.

High blow and impact resistance
BLANCO ceramic is a dense and robust natural material which easily withstands typical domestic loads.

Acid-resistant
Whether vinegar, lemon juice or beet-root, standard domestic acids, lyes and other substances leave no traces and cannot cause any damage.

Hygienic and suitable for food preparation
The surface is hygienic and neutral in taste and odour, which has been confirmed in tests by the ISEGA Institute.

Certified quality
Regular voluntary quality tests by the LGA confirm the high standards that apply to the material and design.

At the source
of good taste.
Kitchen taps from BLANCO
for your personal style.

Mixer tap: BLANCO VONDA, brushed stainless steel

Durable ceramic cartridges allow precise fine-tuning of water flow and temperature.

Untested mixer taps can significantly exceed the limit values for substances which are harmful to health. BLANCO voluntarily has its mixer taps tested for technology and hygiene in accordance with the requirements of the German Drinking Water Ordinance and certified by DVGW CERT GmbH.

With this certification, BLANCO mixer taps offer one of the highest standards of quality currently available on the market.

Fit your sink centre with a mixer tap which matches both your requirements and the style of your kitchen. And above all: **Look for tested BLANCO quality. Voluntary stringent controls guarantee maximum safety and hygiene when it comes to drinking water.**

The **high-quality** interior is also convincing thanks to its various **additional functions** – depending on the model, these can include a hose spray, controls, a check valve or retractable variant for installation in front of the window. Combine the materials and colours of your sink and mixer.

The integrated **check valve** keeps **used water away** when the hose spray is in use.

Elastic **silicone nozzles** keep the **hose spray free from limescale** and can be cleaned simply by wiping with your fingers.

Thanks to their length, the **flexible connection hoses** are suitable even in difficult installations.

As a **market leader for kitchen mixer taps**, BLANCO offers a wide range of products – for a wide variety of interior styles and requirements. A swift overview is provided by the four style areas and the “Special” category for particular technical requirements.

PROFESSIONAL

Oriented towards professional demands

This is the place for those seeking a mixer tap that offers the highest functionality and flexibility.

INDIVIDUAL

Individual design

Award-winning designs, frequently combined with innovative handling concepts, offer the freedom for individual preferences.

MODERN

Modern solutions for any taste

The contemporary range appeals with its tremendous variety.

CLASSIC

Classic models, popular and proven

Whether linear or stylishly rounded, these popular designs will blend perfectly with any kitchen.

SPECIAL

Special functions and installation solutions

This segment offers a huge selection of window solutions and design variations for special use with additional functions.

Discovering quality every day. Tips for the right care.

A **BLANCO** sink centre offers **reliability in every sense of the word**. Quality, precision and function are the most important characteristics of any sink or mixer tap. To maintain your trust, technicians, designers, engineers and fitters display their commitment, experience and passion every working day. Accordingly, all **BLANCO** surfaces are aligned towards everyday use in the kitchen. Stainless steel sinks, **SILGRANIT™ PuraDur™** and ceramic are characterised by their permanently attractive look and excellent ease of maintenance.

Stainless steel

Stainless steel is eminently suitable sink centres. Thanks to its neutral colouring, it can be combined in many different ways, allowing it to blend harmoniously into any kitchen environment. Stainless steel excludes the possibility of absolute resistance to scratches. This can initially lead to minor signs of wear. But regular use and care soon result in a silky-matt, glossy and relatively impervious surface. Stainless steel products by **BLANCO** retain their value and brilliance for decades with the minimum care.

BLANCO POLISH: Cleaning and care agent for **BLANCO** stainless steel sinks and worktops. For thorough cleaning every 1 to 2 weeks.

SILGRANIT™ PuraDur™

SILGRANIT™ PuraDur™ is a pleasure to touch. It is characterised by the very fine-pored, sealed surface of this granite compound material and is the result of research and focus on the specific requirements of a modern kitchen – giving rise to this unique compound material for kitchen sinks.

BLANCO ANTIKALK: Cleaner for maintaining **BLANCO** surfaces made of **SILGRANIT™ PuraDur™**, stainless steel and ceramic. A formulation specially designed for **BLANCO** taps and sinks.

Ceramic

Modern production methods, special manufacturing techniques and our employees' expertise guarantee the consistently high quality of our ceramic range. Regular voluntary tests by the LGA confirm these high demands and guarantee products you can absolutely rely on. Thanks to the high density displayed by the material and a sophisticated processing technique at **BLANCO**, ceramic can be used to realise outstanding functional product concepts.

BLANCO CeraCare™: All-in-one care for high-quality **BLANCO** ceramic. Cleans, polishes and preserves in a single step.

Apart from the sink, mixer tap and accessories, **BLANCO waste systems** also optimise workflows in the sink centre and free up space in no time at all.

Designed for optimised ergonomics and the practical needs of the modern kitchen, the models offer a wide range of possibilities.

Whether as a hinged door or as a pull-out, with manual or automatic operation, with one or more bins, BLANCO waste and organisation systems for the base cabinet improve convenience over the long term. With a sophisticated design, the space available is used to the full.

Always at your kitchen's service.

Ideal kitchen aids.
 BLANCO accessories make things easier for you and your kitchen more attractive.

Floating Grid – creates a work-level in the sink and can also be used as a countertop trivet.

Often it's the little things in life which make a difference. For example, **fitting** a sink with **accessories** can make it even more **convenient** while also making it more attractive – in the form of a drain cover or sensor-controlled remote control.

When preparing food, you can **save yourself unnecessary actions** and additional utensils by using multi-functional accessories.

Innovative concepts and high-quality materials transform BLANCO sink centres into modern kitchen workspaces without making any compromises.

More information about our accessories is available at www.blanco-germany.com
