# BLANCO SOLENTA-S Senso.

The new evolution of sensor technology.

The kitchen is one of the most important rooms in the home. It is where we gather. Chat. Live. And, of course, cook. At the heart of the kitchen: the mixer tap. SOLENTA Senso delivers the next evolution of sensor technology by combining a reliable and sophisticated start-stop user interface combined with innovative design and superb quality.

## Innovation

The perfect balance of precise electronic touchless sensor control combined with standard manual functions.

## Design

Modern aesthetics with unique elements.

## Quality

High quality materials for optimal user experience and extreme durability.

## Function

Inspired by professional kitchens. Large working radius and reach area. High level of user convenience.

## Innovation Sensor technology with start-stop interface.

Water is life. We are used to it being available wherever and whenever we wish. Thanks to the new sensor technology featuring a sophisticated start-stop interface, you now have instant, effortless water control. Water on, water off, without touching the mixer tap. A single hand movement is all it takes.

### Innovative sensor control

Continue working on tasks uninterrupted with a simple hand movement.

### Close range detection

The sensor detection field is set to a precise 6 cm range. This prevents unintended activations when you do not wish to use your mixer tap.

### Intuitive sensor access

With the location of the sensor being under the sprayhead docking arm, you always have access to the sensor technology with start-stop interface, regardless of the mixer tap direction.

Get more done in less time, with less effort.  
Touchless technology makes it possible.

## Function

Inspired by professional kitchens. Large working radius. High level of user convenience.

The working area around the mixer tap often extends beyond the sink. Inspired by high performance professional kitchens, SOLENTA-S Senso offers maximum reach, usability and control.

### Dual-spray

Easily switch between two spray modes. A powerful spray for cleaning and rinsing, and a full aerated stream for filling large pots.

### + Sensor and manual control

SOLENTA Senso combines two handling concepts: automatic sensor control gives you more freedom, while the manual lever allows you to adjust the water temperature and flow.

### Preset water temperature and flow

Determine your perfect water temperature and strength settings using the ergonomic control lever. Use the start-stop feature to turn the water on and off.

### Precise magnetic holder

Simply lift the SOLENTA Senso sprayhead off the magnetic docking arm and snap it back in place when done.

Water on demand anywhere, anytime. Effortless water flow, completely under your control.

# Inspiration Simple. Easy. Effortless.

SOLENTA-S Senso brings a new level of enjoyment to everyday kitchen tasks. Expect to experience significant savings in time, effort and water consumption.

## Make it easy.

Kitchen chores made simple thanks to sensor technology combined with the start-stop user interface. You no longer need an extra hand to start or stop the water.

## Conscious water consumption.

The precise settings for water amount and temperature ensure that you will achieve considerable savings in comparison with other mixer taps. DVGW certification is planned for SOLENTA-S Senso.

## Automatic water stop.

SOLENTA-S Senso automatically stops using the water after 90 seconds. This prevents overflowing and leaves you free to concentrate on other tasks.

## SOLENTA-S Senso when you need it.

The precise 6 cm detection field rules out any risk of unintended activation. Even if SOLENTA-S Senso is activated accidentally, the automatic water stop function ensures your sink will not overflow.

Design  
 High-quality material.  
 Elegant aesthetics.

The kitchen is a stimulating environment for your senses. High-quality, long-lasting materials and discerning design provide the ultimate visual and tactile experience.

LED display

A subtle blue LED display identifies the sensor field and displays the operating mode. A solid light indicates the unit is in standby. A flashing light indicates when the faucet is running.

High-quality hose encased in stainless steel

Mixer taps have to cope with a lot of wear and tear in the kitchen. The hose of the SOLENTA-S Senso is encased with easy to clean stainless steel for maximum flexibility, durability and easy maintenance.

Stainless finish UltraResist

As well as the chrome version, SOLENTA-S Senso is also available with the innovative stainless finish UltraResist. In this version, the mixer tap is especially easy to clean, scratchproof, and much less sensitive to fingerprints than chrome.

BLANCO surface hardness

BLANCO scratch resistance

Passion is when even the smallest detail receives the greatest attention.

## Quality Extremely long-lasting.

The SOLENTA-S Senso complies with the highest quality requirements and is designed to perform seamlessly, everyday, for years to come.

### Easy to clean hose

The flat design of the metal segments prevents dirt deposits from settling into hard to reach spaces.

### Long-lasting

All of the components of SOLENTA-S Senso are subject to strict quality checks and certifications – from the ceramic cartridge to the hose.

### Low maintenance

The touchless sensor technology means fewer fingerprints and less residue to clean.

SOLENTA – Quality made to last,  
as long as the memories you create.

# Choose your SOLENTA-S Senso.

Stainless finish UltraResist Chrome

## Surface finishes

Choose between the classic chrome version and the new stainless steel finish UltraResist surface to suit stainless steel sinks and bowls.

## Lever versions: right or left

SOLENTA-S Senso is available in both right and left lever versions. Which version is the right one for you depends on where the main bowl is placed. If the main bowl is to the right of the mixer tap, we suggest the left lever version (Fig. 1). Is your main bowl to the left of the mixer tap? Then opt for the right lever version (Fig. 2). If the mixer tap is behind the sink, you can use either lever version (Fig. 3).

## + Versatile operation

The SOLENTA-S Senso uses sensor technology with manual control functions. The mixer tap also allows you to manually adjust the water flow and temperature while enjoying the benefits of touchless sensor technology with start-stop user interface.

## + Power supply

SOLENTA-S Senso includes an AC adapter as a standard component.
